   Moderators:
   - Andrew Ashikari, MD
   - Pond Kelemen, MD
     Surgical Oncologists
     NewYork-Presbyterian Hudson Valley Hospital
     Ashikari Breast Center
Dr. Newman is a surgical oncologist with a practice dedicated to breast cancer management. In August 2018 she was appointed to oversee the breast program for the Weill Cornell Medicine-NewYork Presbyterian Hospital Network, serving its Manhattan, Queens and Brooklyn sites. Previously, she worked at the Henry Ford Health System, where she served as breast program director, covering multiple hospitals throughout Michigan since 2015. She is also the Founding Medical Director for the International Center for the Study of Breast Cancer Subtypes, which became headquartered at Weill Cornell Medicine with Dr. Newman’s recruitment. Dr. Newman was Professor of Surgery and Director of the Breast Care Center for the University of Michigan in Ann Arbor, Michigan, where she also served as Program Director for the Breast Fellowship from 2002 to 2015. Dr. Newman holds a Masters Degree in Public Health from Harvard University, and she also obtained her undergraduate education at Harvard University with a major in chemistry. She attended medical school and completed her general surgery residency training at the State University of New York Downstate Medical Center in Brooklyn.

Dr. Newman’s primary research has focused on ethnicity-related variation in breast cancer risk and outcome, the evaluation and management of high-risk patients; broadened applications for neoadjuvant chemotherapy, and special surgical techniques such as the skin-sparing mastectomy and lymphatic mapping/sentinel lymph node biopsy. Her extensive research related to disparities in breast cancer risk and outcome has been published in numerous peer-reviewed medical journals and was featured in CNN’s documentary “Black in America 2”. She has also been the featured breast cancer medical expert for NBC’s “Today Show” twice (2014 and 2017) as well on CBS Nightly News (2015). She maintains a very active community service record, and currently serves as Chief National Medical Advisor for the Sisters Network, Inc., a national African American breast cancer survivors support organization.

She oversees an international breast cancer research and training program involving a network of physicians and facilities in Ghana, Ethiopia, Nigeria, Uganda, Haiti, Barbados, and Canada.

Dr. Newman has been appointed to multiple national and regional leadership positions, including the CDC’s Advisory Committee on Breast Cancer in Young Women (including chaired for its workgroup on breast health messages for the general population); the NIH’s Clinical Trials Advisory Committee; the Advisory Council to the National Institute of Minority Health and Disparities; chairperson for the Breast Committee of the Michigan Cancer Consortium. She has held leadership positions in the most prominent of oncologic academic and advocacy organizations.
